Software programs for pixel-editing for physical media  
The kind of editing for which you may need to purchase software isn't what you do while using Photoshop, but rather, it's a technique for printing the file. You want to change the colors in your

---

finished artworks so they look the same on every print they're sent to or displayed in galleries. The image-editing software that works on color printed materials must be able to modify color printing directly with no color shifts or loss of color saturation. The older programs can't do this because, like Photoshop, they work on one color at a time. \*  
**\*\*Colour Efex Pro:\*\*** Designed specifically for the manufacturing industry, this program automates many of

the steps of creating a print job. Users can specify paper types, presses, paper stocks, frames, border colors, and stock selections, and the program will take care of the rest.

government has asked road transport and highways ministries to consider waiving the tachograph requirement for buses and trucks in urban areas in order to facilitate introduction of electric buses. The decision is expected to open up a lucrative market in the transport and hospitality sectors which accounts for an estimated 3% of India's GDP. The proposed regulation will streamline the tachograph (recording

---

machine required for every commercial vehicle) requirement for these buses and private vehicles in urban areas by waiving it for buses coming up to 300 km per day. Under the new regulation, the government said buses need not be fitted with tachographs, which means they won't have to be fitted with it. These buses can be either fully or semi-electrically propelled. For tractors and other heavy-duty vehicles, the government said

---

tachographs need not be fitted on commercial vehicles operating within urban areas, but it may be assumed that they are coming up to 150 km per day. A ministry of road transport and highways (MoRTH) official said, "As vehicles are rolling out of the garage after a major overhaul, tachographs will be replaced in one go, and hence, no other vehicle will face the inconvenience." The same regulation will also apply for fleet vehicles, that

---

too in urban areas."We have worked out the appropriate regulation with the motor transport ministry. It is likely to be valid for vehicles coming up to 300 km per day as well as for trucks or buses operating on roads within urban areas," said the MoRTH official. Almost all buses and trucks are not fitted with tachographs as the failure rate and subsequent repair cost increases manifold if the machine malfunctions or breaks down due to non-

---

availability of a battery. As per the tachograph regulation issued by the ministry last year, manufacturers or garages that are in the process of rolling out a new vehicle need to ensure that all such new vehicles are fitted with tachographs. As per another order of the same ministry in May 2017, two tachographs need to be carried in tandem, with a primary and secondary tachograph. Tachographs are useful in preventing the

---

pilferage of black-market fuel as these contain information about each vehicle's journey data. On the other hand, the proposed regulation may prove to be a welcome move for manufacturers and fleet owners.
