Bernie Sanders Bernie SandersNYT editorial board remembers Ginsburg: She 'will forever have two legacies' Two GOP governors urge Republicans to hold off on Supreme Court nominee Sanders knocks McConnell: He's going against Ginsburg's 'dying wishes' MORE (I-Vt.) on Sunday said it will be difficult for the Democrats to form a plan to defeat President Trump Donald John TrumpBiden on Trump's refusal to commit to peaceful transfer of power: 'What country are we in?' Romney: 'Unthinkable and unacceptable' to not commit to peaceful transition of power Two Louisville police officers shot amid Breonna Taylor grand jury protests MORE in the 2020 elections because of a lack of consensus on how to tackle his presidency. "Let me tell you, it is not going to be easy for the Democrats to defeat Donald Trump, because there is a lack of consensus on how we have to beat him," Sanders told host Chuck Todd on NBC's "Meet the Press." ADVERTISEMENT Sanders called for a public health care program similar to the one enacted in his home state of Vermont, saying the U.S. has no reason to have the "private for-profit insurance industry." "That is what we got and people have gotten sicker and sicker and now they're dying at a record rate," Sanders said. "And people are waiting for hours for an appointment." He continued: "I think a single-payer system for the health-care system in this country, why that is what we need, the Republicans will not support. I don't know what the Democrats are going to do." Sanders said Trump's "continued attacks

What is the difference between this and VARS, that I used to do this, and it worked fine, but now when I try to create it says that I am not activating a Vars/Variables, all I want to do is create is open a screen to create a label, and then link it to the VAR I created. I am really stuck, please help. A: Find the 'Variables' VAR you created and run VAR.Flush to save the VAR/Variables. It won't link the label to your VAR. In the next.dwg file you open (as a new drawing) choose Save & Close. The new drawing will open. Choose 'Open...' from the 'File' Menu. Navigate to your previously created.dwg and choose 'Open'. Your VAR will be available and linked to your VAR. -----BEGIN RSA PRIVATE KEY----- MIIEpAIBAAKCAQEAsVB+ZtwQYsxRHgFqj5t8rQOFe7OdfK8W5TZnbdv+n1q+Kx5g u2TfhM5Jx7qYsYVpyMnngdYx7q1KBJ5mMrzlvXW+KP+EJ5zywqXM98o6TOFJSxS8 6qtWjf6THnK9uH4QbCmCgWK7N36i9LwwvKreOoSI5IqNTaj7u4z3r2y2Ww2kR+j3 FvKmPIS8jW0kz+IJKfF9J921Qo8iTmXLRV3zZOB8Eofywc7jv+0hR3D+k5gzxXth yVcJg49p3i6Sz5nAQKQs7dwTpOjT8rvw4ZjFvwzLz9o6nxeTnNvjue3d7cPZn3uZ PkrY5rs2mYJ/NVp7+nU
