Online image manipulation: Photoshop offers the ability to go to the Internet and manipulate images online at sites such as `www.pixastic.com`. Using an image editor such as Photoshop makes this procedure more convenient than uploading directly to a website. This process is a no-go for those concerned about copyright issues, so be sure to check all licenses before using an image from another source. \*\*\* Today's digital cameras make a convenient photo-editing tool for those who don't want to use a computer. By using the digital camera's built-in software and the web camera function, you can capture images and immediately upload them to websites for sharing and storing. \*\*\* A Photoshop tutorial can be quite complex for a novice user, and you don't want to begin by learning about how to manipulate a photograph, so be aware of your goals before you choose to learn this software. ## PHOTOJOGGING It has become very common today for people to capture a series of pictures of something — a scene, a person, and so on — by holding a digital camera in one hand and taking a photo by pressing the shutter button with the other hand. Once the picture is taken, the camera's flash synchronizes automatically and snaps the picture. The image is then displayed on the camera's monitor, and you can choose to take another picture immediately or wait a few seconds to allow the flash to recycle before you take another photo. This "photojogging" is a great way to capture a series of similar images; although you may not realize it at the time, you may have made a picture of an item and posted it to a web site just minutes or hours later. \*\*\* Explore your camera's features and find out if your camera has the ability to "snap" multiple images in rapid succession. You may be surprised at just how handy this feature is! \*\*\*

Q: KendoUI fails to produce correct png on Android browsers Using KendoUI for Android, I have found that it does not produce a correct png. I am able to open the relevant folder and browse through the image files, but I fail to see the correct image in my application. Here is a live demo (and download link to.apk): Any suggestions? A: The problem is occurring because of the CSS. The.k-content class has a box-shadow radius of 10px on the android site. The radius is not being applied in the CSS, which is why it is failing. This is currently being corrected in a followup to this issue: Q: How to compare time in Java? How to compare time in Java? I have a string variable as below: String fromTime="8:50 PM"; What I want is to compare the time with a fixed time say for example it will be 8:50 PM and now the user will enter an input time like 9:00 PM then I want to compare them for ex: if (nowTime>fixedTime) { } A: You can use Date.parse(String) and then compare dates and times. Date fromTime = new Date(DateFormat.getTimeInstance().parse(fromTime).getTime()); Date nowTime = new Date(); and then just compare one date to another: int diff = nowTime.getTime() - fromTime.getTime(); A: If your fromTime is a String like "8:50 PM", you have to use: String fromTime = "8:50 PM"; DateFormat dateFormat = new SimpleDateFormat("hh:mm a"); Date nowTime = dateFormat.parse(fromTime); Date fixedTime = dateFormat.parse("08:50 PM"); if (nowTime.after(fixedTime)) System.out.println("fromTime is after fixedTime"); Q: Convert a string consisting of multiple floating point values to a decimal value Given a string

ALOX5AP methylation is associated with gene expression in colorectal cancer. To investigate the methylation status of ALOX5AP in colorectal cancer (CRC) and its prognostic value, we used bisulfite pyrosequencing (BSP) to determine the status of ALOX5AP methylation in CRC tissues and their adjacent non-tumor tissues, and compared the methylation of ALOX5AP with gene expression in the same set of CRC tissues. ALOX5AP methylation was increased in CRC tissues than non-tumor tissues and demonstrated a positive correlation with ALOX5AP expression in CRC tissues. Methylation status of ALOX5AP was associated with tumor stage, lymph node metastasis, tumor differentiation and other clinicopathologic features. Survival analysis revealed that ALOX5AP methylation was an independent prognostic marker for overall survival in CRC patients. Our results suggest that ALOX5AP may be a potential target for diagnosis, treatment and prognosis of CRC patients.Q: how to replace # with variable? can i have a variable take the place of the # in this statement? var replacement = '#12345'; the # in the variable represents a # of course, but i need it so that the \$205 can be changed. i want to change \$205 to #12345 str = str.replace(/\#\$/g,replacement); A: You have to escape the #, because it is a special character in regex str = str.replace(/\#/g,replacement); EDIT: I think you are missing something here, the string needs to be encoded with " for it to work. var replacement = ""; //Now do: var replacement = "#12345"; var str = "my string"; str = str.replace(/\#\$/g,replacement); Also, take a look at MDN String#replace. Side product A side product or by-product is a product that is formed from the reaction of a reactant with one or more intermediates and/or starting materials. For example, the Sulfuric acid by-product of a hydration reaction is formed from the reaction of water with sulfur trioxide. See also By-product References Category
