Infrared interference control using nondestructive readout: theory and experiment. We propose and demonstrate a new optical system, which combines interference and chirp for infrared wavelength multiplexing for high spectral resolution and contrast. This system is based on digital-to-analog converters (DACs) and a mechanical chopper, and the contrast can be controlled by using a machine that modulates the reference interferometer's optical path. Three experiments are reported, which demonstrate high spectral selectivity (~ 0.2 GHz) and contrast (~ 5 dB) between spurious and signal wavelengths with a limited dynamic range that is preserved in any phase delay. The performance of this system is compared to that of similar systems based on DACs operating in analog or digital domains. The system's requirements are significantly lower since the system can be multiplexed with a machine, thereby increasing signal rate and throughput without adding complexity. TRANSFER TRACKER STATUS: Signing The Colombian striker has rejected a transfer to France and signed with Sporting Kansas City. Diego Valeri will return to the Seattle Sounders in a move which clears the way for him to join Major League Soccer rival Sporting Kansas City. Sounders general manager and president of soccer Garth Lagerwey confirmed the agreement on Thursday as he paid \$3.5 million plus incentives to terminate the Designated Player's contract. Valeri was originally contracted to play in France with French club OGC Nice. But the transfer window has closed in France and the 29-year-old is now free to move to MLS, where he will join his sixth MLS club. Valeri had a breakout season in 2016, netting 14 goals to win the MLS MVP award and guide Seattle to its third consecutive MLS Cup title, the biggest single-season run in league history. Valeri arrived in Seattle after winning the 2014 MLS Cup, and he never quite lived up to the potential that earned him that first MLS Cup win with the Portland Timbers. But he made a strong impact upon his arrival in Seattle. Valeri initially provided a physical presence and scoring threat, helping make the Sounders one of the most dynamic offenses in MLS. He also extended the club's winning streak to 14 games, the longest in MLS history. Valeri made 52 appearances during his two years in Seattle, netting 17 goals and adding three assists. Ahead of the 2016 season, there were rumors that Valeri's future might

Q: How to get the latest data at the end of a day in mysql I am trying to show the maximum time of a day for the latest data at the end of the day. SELECT sysdate, COUNT(id) as `Total` FROM user LEFT JOIN room ON room.user_id = user.id GROUP BY DATE_FORMAT(floor_time, '%Y-%m-%d') ORDER BY `Total` DESC The output should be: 2020-01-01 00:00:00 2020-01-01 23:59:59 2020-01-01 00:00:00 2020-01-02 00:00:00 2020-01-02 23:59:59 2020-01-02 00:00:00 2020-01-03 00:00:00 2020-01-03 23:59:59 2020-01-03 00:00:00 When I use DATE_FORMAT, it will drop the '00:00:00' in the earliest data. A: From the doc: The DATE_FORMAT() function is an SQL standard function. All of the date-time and time functions are MySQL extensions to the SQL standard. Therefor, you could use DATE_ADD() to add 23:59:59 hours to sysdate: SELECT sysdate, COUNT(id) as `Total` FROM user LEFT JOIN room ON room.user_id = user.id
