UVC curing and apoptosis induction in wound healing. UV light is a low-cost radiation for in situ treatment of various indications. The aim of this study was to develop a novel method of treatment of wounds that is simple, versatile, and economic. A novel device was designed and fabricated, and two cell models, both cultured human embryonic keratinocytes (HEKa) and murine epidermal JB6 cells, were tested with it. Different doses of UVC light were used to detect cell viability, cell apoptosis, and signal transduction pathway activation. Results showed that a dose of 1 J/cm(2) can be used to reduce cell viability of JB6 cells by 15% and increase apoptosis. The mechanistic investigation revealed that the increased apoptosis is associated with phospho-p38-mitogen-activated protein kinase-caspase-3 and 8 pathways but not with phospho-p53-mitogen-activated protein kinase-caspase-3. However, p53 mutation on the nonlethal JB6-1 cells did not cause UVC-induced apoptosis. This result suggests that UV-caused apoptosis occurs independently of p53 in normal cells. For HEKa cells, the UV irradiation induced apoptosis through phospho-caspase-3 pathway and reduced cell viability through phospho-AKT-caspase-3 pathway. Our novel device may be useful for the treatment of wound healing.Q: Fatal error: Using \$this when not in object context This is my first time programming using PHP. I am a bit of a newb so I'm asking for the answer to my question, though if it's a duplicate, I'd appreciate any pointers to what I can read for the answer. I'm trying to sort an array by its value (last name), then alphabetically. I'm having trouble getting my code to sort the array properly. It works for the first part but not the second. In the first part I can't get it to sort the first element correctly. My code works so long as the item with the top value in the array is the first element. But when I print the array, "Boyd" should come before "Arkena" and they are still listed in the same order. If I output the array in the php file as in the example code, "Boyd" appears before "Arkena" if that
