Q: How to read what can be inside an editbox using c++ builder XE? I want to create a program that reads what is written in an editbox using c++ builder XE. The problem is that i don't know how to read what is written inside the editbox. Please help me. Thanks in advance. A: TextProperty is an older version of what you are looking for. If you are dealing with strings, you can use Rich Edit Strings. TStrings have a Length property. GetString() returns a raw string that may be modified. Try this: function TLbForm.GetEditText(const Text: String): String; var editStr: TRichEdit; textLen: Integer; begin Result := ""; try editStr := TRichEdit.Create(Self); try textLen := editStr.Lines.Count; if textLen > 0 then Result := editStr.GetString finally editStr.Free; 648931e174
