October 8, 2014 It's Monday! How about a beer? How about a recipe? How about...just a beer? Ha! OK, back to the recipe.... So you know how I LOVE those hybrid seitan burgers? Well these are perfect for this time of year - crisp and a tad on the edge of spicy. The key to this recipe is not over-cooking the seitan, as that would turn it outta shape. We are just going to sauté and then serve as is. Side note - have you read Carol's book? It's a great read - enjoy! Mix together all of the seitan ingredients (noodle sauce, pizza sauce, garlic, onion powder, oregano and pepper). Heat a drizzle of olive oil in a large skillet. Once hot add the seitan and let it cook for 3-5 minutes. This will give you enough time to assemble your burger, so go ahead and assemble your meal. Cook for another 3-5 minutes, depending on how you like your burger cooked. Line the top of the pan with a paper towel, and then pour the water over the top (do not pour the water directly onto the seitan. You'll thank me later). Allow the seitan to steam for 5 minutes. Pierce the seitan with a fork to ensure the water seeps back into the seitan. The water will create steam as it returns to the skillet. Continue this process until the seitan is steaming and the water is back in the skillet, about 5 minutes. By this time your burger will be ready to eat. I choose to top the burger with some Italian dressing (which, by the way, is great on a lot of things, don't just believe the hype). Happy Monday! Crisp Seitan Pizzetta 1 1/2 lbs seitan 1/2 cup dry red wine Olive oil Sauce - Pizza Sauce, Spicy Red Sauce, Baked Beans -Prepare your seitan according to the instructions. Once your seitan is ready, spread it out evenly on a baking sheet or dish and place in the freezer for about 30 minutes. Once the seitan has frozen, remove it from the freezer and cut into bite sized strips. Place the strips in a bowl and mix with the red wine, red pepper flakes and seasoning.

Tool The brushes in Photoshop provide a variety of options, such as size, opacity, pressure, and direction. The options are adjustable in the Properties area on the tool bar. You can choose the size and set the brush's opacity. The Pressure controls the amount of pressure you apply to the canvas to paint with. When creating brushes, you should try to use as little pressure as possible and paint with moderate pressure to achieve a clean, tight result. You can also add lighting to your brush and adjust its size, shape, and opacity. Brushes in Photoshop can be affected by other brushes; for example, if you use a brush that's black and you start a brush painting with a color other than black, the final color may not be the same as the original brush. Generally, this doesn't cause any major problems, but it can be an annoyance depending on what you are trying to achieve. Fonts One of the most useful features of Photoshop is the font palette. You can use this to change the color, font, and size of anything you like. Because all objects in an image are made of pixels, they can be easily edited; for example, you can add various colors to a word or change the position of a word in a paragraph by using the font palette. Photoshop comes with a multitude of fonts, including popular fonts such as Helvetica and Times New Roman. You can use the font palette to edit the font colors and size. The easiest way to work with the font palette is to use the color swatches. You can just click on a color and use the Shift key to apply a different color. To change the font, use the Type option. Effects You can use Photoshop to blend images together or apply different effects to an image. There are many filters available for you to choose from. You can create images with effects such as textures, lines, neon, reflections, adding color, removing color, and adding soft focus. You can also create seamless images and create a collage. You can use Photoshop's Screen and Soft Edges tools to create a matte border around your image. You can also use the Gradient tool to create a gradient. The Gradient tool is very useful for creating the gradient effect. You can use it to change the image's color and blend it together. When working with gradients, first create the shape you want to use, such
