(MUSICNIZER is a simple and powerful audio data management and management software)Facebook Greensburg, Kan. — Two days after a resident reported hearing a gunshot on their property, police located it was a hunting accident. Sheriff's deputies said a man hunting with his family found the weapon and stopped shooting, but his shot hit a nearby tree, which crashed through the roof of his garage and into his garage — striking his car. The homeowner's daughter reported the gunshot, and police and their K-9s smelled the gas. The coroner said a gunshot wound was found on the child's mother, who had been shot twice. She was dead, and her daughter was wounded. The Sheriff's Office investigated, and couldn't find any other signs of domestic violence in the home. A background check showed that the gunman was the husband of the woman, according to police. They said he was in prison in another state and was not related to the family.
