You can browse the program's home page to see a sample of the available symbols ([www.adobe.com/products/photoshop/11/](http://www.adobe.com/products/photoshop/11/)) or use any of the three ways shown in Figure 2-4. ## Adobe Photoshop 2021 (version 22)

You are here Into the Woods: Decibels for the Theatre When I was working with Sharon Feiling at UBC's School for the Contemporary Arts, she told me that one of the skills I'd need to develop if I wanted to be a creative theatre director was the ability to create the sound for the show. In order for actors to experience the space that the playwright is conjuring up, they need to imagine a "back-story" — where the action is happening. I realized I knew nothing about "back-story," so I was curious to learn how that was done, and how sound was a part of creating the "back-story" of this play. Enter Doug Ching's book, Into the Woods. Ching, who you may recognize as a composer for the Vancouver Opera and as a music director for theatre companies, offers this concise and helpful definition of the back-story: "Back-story is the history of your world. Your world in this piece. There's a historical record that could fill a library. Many plays are only able to hint at it and are often vague. A good back-story is the equivalent of the miniseries. It's important to fill in the historical narrative of this piece, the history of the characters." Ching's book provides seven useful strategies, but all of them are aimed at helping writers use time and place to create a compelling plot. He points out the importance of time and place in constructing a compelling plot: "As the plot of any work progresses, we accumulate more information about time and place, sometimes more significantly for the heart of the piece. The decisions we make as playwrights for our plays about 'time' and 'place' have the ability to enhance the heart of a play or collapse it into a sense of déjà vu, as when the audience feels trapped in time or a place without a historical context." If, for example, you want to write an anti-war play set in a time and place that is unfamiliar to the audience, you'll want to think about what aspects of history will be most meaningful. Ching offers a definition of historical context that is fascinating and helpful: "Historical context is the story of the characters

Q: How to add values to a List from another List? I have two List and I have to add the values from List one to another List. Here is the sample code:- class Class1 { private List myList1 = new List(); public List MyList2 { get; set; } public void AddList() { for (int i = 1; i myList2 = new List()); public List MyList3 { get; set; } public void AddList(Class1 class1) { for (int i = 1; i ();). So the instance is being created to the default, no-parameter constructor - that's why you can assign to the property MyList2 and the assignment is not blowing up. If you change it to a new-() instead of a new not-named-with-parameters constructor, the program will throw. Note that if you made MyList2 a readonly property instead of an auto-property, the compiler would have flagged the assignment here as well (and you would have not gotten it working). A: The problem is that you
