PORTABLE SOFTWARE FOR MINITAB 16 :: FREE OF CHARGE BY THE MINITAB TEAM The free minitab 16 software is distributed under the terms of the GNU GPL. It runs on all the same platforms as the other Minitab 16 products except that it is not officially supported by Minitab. It cannot be considered a successor to the desktop version of Minitab 16. This book will be a vital read for any Cetacean Scientist. Very helpfull. This book is a free sample copy. So, you can easily download this book from its. 34.A 47-year-old woman who was traveling in Essex County, New Jersey, has died after being hit by a train while crossing the tracks. Jersey Journal reports that Amanda Carlin was traveling along the Keystone Crossing rail line in Newark, where she was struck by an Amtrak train as it traveled from New York City to Trenton, NJ Transit said. The woman was pronounced dead at the hospital, according to the agency. Get Breaking News Delivered to Your Inbox NJ Transit spokesman Michael Marsico says she stepped off a PATH train when it was about halfway across the tracks. No one else was injured in the incident.Q: Bond functions as closed form. Is there any general rule for when a bond function is closed form. What I mean with this is that is possible to be expressed in closed form? I have in mind the double exponential bond of a path integral, but the usual characterization of a bond as a product of exponentials of bond angles doesn't seem to work. A: Yes. Let α be the bond angle, and $\vec{r}=(x,y,z)$ the 3d vector connecting the two beads, $\theta(r) = \arctan \frac{y}{x}$ $\theta(r)$ can be replaced by $\frac{dx \times dz}{dx \times dx + dy \times dy}$, using Jacobian. By definition, $\theta(r)$ is a function of \vec{r} , and so is $\sin^2 \theta(r) = 1 - \cos^2 \theta(r)$. $\cos \theta(r) = \frac{r^T \vec{r}}{r^T}$
