São Paulo, Brazil – Feb 23, 2016 – WikiOptix, the leading provider of video surveillance solutions, is proud to announce the acquisition of Almamedica, a leading provider of wireless network infrastructure products. The company, which has been in business for almost a decade, will join WikiOptix in May 2016. With the sale, WikiOptix acquires a state-of-the-art wireless network infrastructure product portfolio, which includes antennas, radio repeaters and sensors, for use within its mobile and fixed CCTV and industrial camera solutions. “The acquisition of Almamedica allows us to rapidly develop our offering in one of the fastest growing areas of the industry,” said Dave Bagnall, VP Marketing, WikiOptix. “Solutions based on our TSN products complement those based on our cloud surveillance platform and best in class IP-based image processing. The benefits of the combo solution position us well to lead the market in next generation fixed, mobile and cloud solutions.” ALMamedica is the solution provider for companies and organizations looking to create a unified wireless network infrastructure that can be used for both mobile and fixed access and video solutions. This includes wireless cameras, antennas, repeaters and sensors. “We are excited to be joining WikiOptix at a time when the video surveillance market is booming and becoming more consolidated,” said Scott Mannion, co-founder and CEO of Almamedica. “With very competitive pricing and the introduction of WPAN networks, the wireless infrastructure

market is beginning to move from being somewhat of a commodity to a highly competitive market. The addition of Almamedica to WikiOptix will allow the company to accelerate its market position by providing the backbone for the highly integrated mobile and fixed video solutions.” The company is currently installing WPAN networks for customers in the United States, Brazil and Australia. About WikiOptix Founded in 1999, WikiOptix Inc. is the world’s largest manufacturer of embedded computer vision cameras, including low-light/day and night capable cameras. As a leader in the development of products that feature AI based image processing capabilities, WikiOptix is focused on developing the next generation of mobile, fixed and cloud camera solutions. Headquartered in São Paulo, Brazil, WikiOptix has operations in the United States, Malaysia and China. Visit for more
