Q: How to get all the properties of a class? I need to get all the Properties of a class in c#, I'm not sure of the best way to achieve that. I want all of them to have the same class so I can add another property and they'll all be in the same place, for example: [Stuff] public string[] MyArr { get { return MyArr; } } Then I need to be able to add another property to it: [Stuff] public string[] MyArr2 { get { return MyArr2; } } But I want it to be able to get both of the arrays, without having to make another class and add properties to it every time. Start with one hand while you simply make any one of these 10 movements. Then move on to your other hand. Go through a few sessions each day. Give yourself at least a few weeks to work on this. 10. Fingers to Brain Drill Close your eyes and make a fist. Let your finger-tips touch your brain. When you do, let go, and give a slight wiggle to your hand. Do this again and again, as many times as you'd like. When you're done, you'll find that your fingertips will feel the exact spot that's triggering you. If you remember, you've now "been there" and "knew that feeling."
