

For Real-Life Players, This Means An Even More Intimate Connection to Football In Real Life, They Earn A Salary... At FIFA, It's A Career FIFA has always been very much about the athletes, many of whom made their names in other sports before moving on to representing the sport's most popular game. In the past couple of years, there's been an even more intense integration of real-life athletes into the game. Matches and the teams that play them are now infused with real-life athletes, who bring new techniques and behaviours to the game. FIFA Sport has now added real-life players to the series for the first time ever. These players will use the same skills and abilities that they use in everyday life, and it's up to you as a player to take advantage of their presence and a level of authenticity and realism that you have never experienced before in a video game. In addition to hyper-mobility technology, FIFA 22 brings in a number of new features to FIFA players to enhance the experience of playing football in a brand new way. We are going to take a closer look at these new features in this blog. A Quick Introduction To FIFA 22 NEW LAZER TECHNOLOGY FOR PLAYERS: For years, players have been frustrated by lazer kicks. Our goal was to provide a better experience for players. SIMPLIFY THE FOOTBALL OBJECTS: Players will have access to football objects that are easier to use. Players won't have to spend hours configuring them, they will be ready right out of the box and provide the best experience for the gameplay itself. INCREASE THE ABILITY TO PLAY DIFFERENTLY: Players will be able to play different formations, to play 4-3-3, or to play with as much or as few lines of players as they choose. SIMPLIFY THE FIXTURES: We have made the fixture list easier to handle and process. FAST LANDSCAPES AND GRAPHICS: While most players will be better-looking than ever before, the overall quality of the football will look amazing. We will spend more time on the graphics at the end of the year. NEW PERFORMANCE-DETAILED MODELS: This year, our modellers are going to get

In FIFA, you and your friends take on the roles of real world footballing legends to compete for the World Cup in iconic stadiums around the world. You control the best players in the world, and the unpredictable nature of real-world football makes every match unpredictable, with tight finishes and moments of magic. Create and share your own player using The Journey and manage your virtual football club in Create a Club. How do you play? 1. Controllers The FIFA Controller is designed specifically for fast-paced, arcade-style gameplay in FIFA 22. A highly responsive thumb stick and four action buttons (A, B, X & Y) delivers tactical control to guide your moves. You can use the new left analog stick (LAS) to sneak through defences, and, by pressing A/A or B/B, you can perform trickery moves that will cause confusion in an opponent's back line and create chances for your teammates. In FIFA 22, you can even zoom in and out with an innovative ZR™ system that allows for on-the-fly camera tracking. 2. Pause to play Pausing FIFA 22 is easy. You can pause mid-play and reset the game in-game using the new 'Pause for Now' feature. You can also pause live matches using the new 'Pause Live Match' button on the upper right corner of the screen. 3. Player movement FIFA 22 includes two new movement modes - Free Movement and Tackle Control. Free Movement offers unrestricted freedom of movement with no restrictions and no control over the direction of your run. Tackle Control gives you control over your run direction by restricting your movement to straight-line speed rather than diagonal acceleration. Try both movement styles in FIFA Ultimate Team™ Mode to create more opportunities to score. You can also use the new Z-boundaries to score with your own players in Free Movement. 4. Tactical movements Leverage the ball to your teammates, anticipate a pass and position yourself close to the ball and be ready for a tackle. Shielding your teammate with your body in tackle defence will work in your favour; intercept a pass to gain an attacking position and position yourself in an advantageous position by the opposing team's goal. FIFA 22 offers two new defensive styles - Short Pass Control and Penalty Box Control. Short Pass Control is ideal for players who prefer to pass and move with the ball rather than launching long, vertical passes. Penalty Box
