A 35-year-old woman with aortic dystrophic calcification was referred for evaluation of progressive right flank pain. She underwent exploratory laparotomy with evacuation of hemoperitoneum. Spontaneous retroperitoneal hemorrhage is an unusual manifestation of aortic calcification. A high index of suspicion and complete, accurate preoperative diagnosis are required. To our knowledge, this is the first case of aortic dystrophic calcification with retroperitoneal hemorrhage.Adding an IP address to a VPN server pool is just one of the things you can do to make sure you're getting the most out of your VPN. See for yourself why it's so essential! Click on the VPN Server Pool buttons to view info about how your VPN Server Pool is working and improving. (note: you must have a VPN Server Pool enabled in order to view its details) How is the VPN Server Pool working? In last month's update, we implemented automatic IP address assignment for some VPN Server Pool clients – clients that are connected to a VPN Server Pool and don't have a consistent IP address. In previous updates, we added

The patient was an asymptomatic 69-year-old man with a painless right lacrimal gland tumor. The tumor was noted to be enlarging and located below the superior orbital fissure. After a wide excision of the tumor, it was covered with muscosa. This paper highlights the histopathological characteristics of mucinous adenocarcinoma of the lacrimal gland, and reports its rarity.{ "created_at": "2015-02-27T22:27:37.142323", "description": "A Ruby HTTP library built on top of Net::HTTP.", "fork": false, "full_name
