Jakubowice, Choszczno County Jakubowice is a village in the administrative district of Gmina Kłomnice, within Choszczno County, West Pomeranian Voivodeship, in north-western Poland. It lies approximately south of Kłomnice, east of Choszczno, and east of the regional capital Szczecin. The village has a

population of 580. References JakubowiceThe search results will be different depending on the expected result set. For instance, if you ask the server for a single record from the DB, you'll probably be returned a single object. However, the server doesn't know what kind of data structure you're expecting. It just accepts the parameters you pass it and gives you back the result you asked for.

Another more powerful example is that if the server comes up with the record, say in a list of 10 objects, it doesn't know what order to return them in. It just hands them to you whatever way you gave it the parameters. Remember that in C#, when you use the query syntax, the variable we name the parameter doesn't necessarily represent the actual parameters we used when creating the query. Query Syntax With the query syntax, the parameters you pass to a query are represented inside the variables.

They're what we call "named parameters". In C#, the query syntax looks like this: `var res = db.JobList.Where(n => n.SomeValue > 2).OrderBy(n => n.SomeValue).Select(n =>`

n.SomeValue); In other words, the code above calls.Where() on the database. It then passes it the parameter called n. It then calls.OrderBy() on the database. It then passes it the parameter called n. It then calls.Select() on the database. It then passes it the
