The dynamic, physics-based Player Impact Engine (PIE) is used to power high-impact collisions. Players equipped with a motion capture suit and a set of sensors (which replace the right analogue stick on the Dual Shock 4 controller) will experience more accurate tackling, with collision animations that react better to the orientation of your players and the surface they are on. A new ESPN broadcast system includes the TV broadcast, online streams and game broadcast. Widely used in real-world matches, the broadcast system features a new Real Time Stat Pack – the first of its kind in the industry – that gives viewers a unique, live view of the game, of players, teams, substitutions and strategies being used. An improved game engine allows for faster, smoother gameplay. The engine, currently used in FIFA 19, enables players to experience more realistic movements when they tackle, pass, and receive the ball. In addition, the inclusion of Zones of Control has been incorporated into the new engine, delivering the same level of player control on all ball touches, even on free kicks and penalty kicks. New features for Ultimate Team: In FIFA 22, there are new rewards for Premium Members that fans will love to earn. Players can collect Stat Packs from goals scored in matches, as well as beautiful and unique items. With the new performance-based rewards system, players can be instantly rewarded for their goal scoring and game-play performance. New Broadcast Features include: • ESPN broadcast system with new Real Time Stat Packs • Authentic crowd reactions • New Big Six international broadcasters • New editor features • New camera angles New Teams: • Madrid, Barcelona, Manchester United, PSG and Juventus, among others, are featured in the game. New Playable International Teams: • Argentina • England • Germany • Mexico • Netherlands • Poland New Playable Countries: • United States New Commentary: • Commentary using the “ESPN Style,” featuring Hall of Famer Keith Jackson, for the first time in this installment of FIFA. Look for the Story mode as well as a return of the PES Online mode of last year. A few games will be worth playing, such as FIFA 19, Madden NFL 19, NHL 19, FIFA 17, Destiny 2, and Destiny 2 Forsaken. FIFA 22 is most likely going to be the best football game in years, but what about PES? PES 2018 is almost here and is going to be an even better product than last year. Some of the biggest changes being PES Online, something the fans have been asking for, better Graphics, multiple game modes, and a one-on-one mode. I am a big soccer fan and have been playing the game for years now. Most of my friends, my coworkers, and even my family like soccer more than anything, and most of them play FIFA. It's going to be hard for PES to compete with what FIFA is going to be capable of. If FIFA wins over the competition this year, there is a chance PES 2018 won't be able to compete in the same way.
