Such clever work and reporting! Carry on the superb works guys I have incorporated you guys to my own blogroll. Thank you a lot for sharing this with all folks you really understand what you are talking approximately!Q: Is it possible to declare a variable type with a string as a default value? I can do something like this : var foo = "test"; But I can't do this : var test = "test"; Is it possible to create a variable with a string as a default value? A: Try this: var test = "test"; It's basically the same. A: You can but don't, because it's possible to pass the variable test to some other function, which will have the same name. var test = "test"; alert(test); function(test) { alert(test); }(test); If you want to just assign a value to it and not let anyone else use that variable, and assign its value at run time, you can use a variable with a leading underscore: var _test = "test"; And then this is the equivalent of: var test = "test"; alert(_test); function(__test) { alert(__test); }(__test); Note the double underscores: var __test = "test"; alert(__test); function(___test) { alert(___test); }(___test); Pages Wednesday, December 15, 2010 Lydia Sparks - Quiet Grace Nothing like a little controversy to create a stir in the world of Christian fiction! What started out as a kind of polite public disagreement between Lydia Sparks and another Christian book blogger, has turned into a heated exchange over the morality of the abusive relationship in Lydia's new book, Quiet Grace. 648931e174
