The Rise of India: Economic Policy in a Liberalising Market .Mental health checkups for US troops at MCB U.S. Army Garrison, Japan, and at MCB Yokota Air Base, Japan, which are located several hundred miles northeast of the Russian border, are being changed to include the evaluation of possible post-traumatic stress disorder (PTSD) symptoms. The change to include screening for PTSD was recommended by the commanding officer and agreed upon by the Counseling Center staff after discussion with the Council for American Defense chairmen of the Center. The change was made based on a decision by the Army psychologist that the annual PTSD checkups for all US troops at US military installations in Japan — MCB U.S. Army Garrison, Yokota, and MCB Yokota — was cost-effective. Elon Musk is sticking with his guns. Musk says that his controversial “pedometer” also found that his Falcon Heavy, which blasted off from California on Monday, had actually gained another second of launch time due to a “successful test to prevent roll-back in microgravity.” “Only people who didn’t watch the launch will complain about the ‘five seconds,’” Musk tweeted Tuesday. It was only a matter of time before those who have been patiently waiting for the billionaire’s rocket to succeed — and some who believe SpaceX must prove itself for that to happen — would take his rocket time measurement with a grain of salt. After all, Musk had bragged that the rocket was “live” for its first attempt, and it was only later that the company announced some quirks that needed to be worked out. But, if Musk can successfully beat his own timeline for a successful launch, it should lend credence to his argument that his rocket was closer to becoming an operational vehicle than other rockets currently in the market. Typically, commercial rockets only gain seconds
