What's New In?

Give your soundtrack some oomph! Breakaway Audio Enhancer does exactly what it says on the tin: you can boost, enhance, and mix your audio at home, post-production, and with nary a dollar for your hard-earned moola. The ultimate tool for audio professionals, prosumers, and audiophiles! With Breakaway Audio Enhancer, you can enhance your existing sound, add new effects to create and mix your own audio production. Enhance and boost your existing audio recordings You can enhance or boost your audio content by simply selecting the sound from your media library and choosing a type of enhancement effect. The sound will be modified and enhanced based on the parameters set up by the user. To do so, you can load up different audio tracks from your media collection and choose an enhancement effect from the list in the top-right corner of the interface. The available audio effects are: Add Sound Effects, Add Growl, Filter, Mono, Pitch, Reverse, Stereo Width, Waveform, and Waveform Zoom. Add new effects to create and mix your own audio production If enhancement and mastering sound doesn't quite cut it, you can always open up the user's page, paste the sound, choose a sound effect, and enhance or mix it by adding in your own effects, which can be done with additional form fields for "starter" and "custom" effects. To do so, you can paste a new sound into the "Add Effect" form field, select an effect, and then edit or copy and paste audio into the "Starter effect" or "Custom effect" box respectively. You can choose the amount of effect in each box, how the effect should behave, and how often, if at all, it should repeat. This menu also features a set of "factory presets", which allows the user to make any additional changes to the audio and blend the audio into one track, one effect at a time, or a "blend" effect to combine all effects. Work with audio in a simple to use interface The interface is extremely simple to use, with a clean, black and white design. Each effect offers a quick breakdown on how it works and can be found in the "options" drop-

down menu. Additionally, the user can check out the track or audio file currently selected with the arrow buttons, and click on the browse button to access audio files in their media library, with no limitation on size. You can also use
