Roblox is a sandbox social platform game engine that allows users to create their own games. It was founded by David Baszucki and Erik Cassel in 2004. Roblox began in 2006 when it was released for download by Roblox Corporation. The first big name games to come from the platform were The Farm and Monster Island. By 2008, Roblox had over 15 million monthly active users. Since then, it has grown to host over 164 million monthly active users by August 2020. It has become a gaming platform geared toward children, who make up an estimated 40% of its users. The popularity of Roblox expanded throughout the 2010s. Games like FarmVille 2 and Defense of the Ancients 2 were developed by Roblox studios and made popular on other platforms. Growing Instability In 2009, Dave Cassel wrote a blog post about the growing instability of the company, which included an internal review of the company's core values. He expressed concern about the actions of CEO David Baszucki and president Adam P. Schrader. Cassel states the company was taking on too much debt. He found the company's accounting to be inadequate, stating that as of December 2007 the company had \$20 million in accounts receivable, \$10 million in accounts payable, and more than \$6 million in interest expenses. Cassel also noted that the company was in danger of being sued by at least three developers who had entered into contracts with Roblox, but hadn't received promised credit after co-founder Erik Cassel had sold his shares. In response, Roblox suspended construction on its own game, Art Academy, to rework the game's ticket system to benefit developers, then ended the suspension once the modifications were complete. Cassel criticized the company for raiding too many of the game's development team for overseas positions within the company, citing the departure of co-founder Erik Cassel, then-head of game design Michael Deano, and several other developers. Cassel also complained that Roblox was increasingly dependent on investors and not its own game designers to create new games, and that it was failing to protect the new games it was developing from being pirated. Discrimination Accusations In early July 2011, a lawsuit claiming discrimination was filed against Roblox by a former employee, Diego Peralta. The lawsuit alleged that Roblox's corporate headquarters had various odd policies, with Peralta's biggest complaint
