## HP Lasejet 1000 Series Windows Driver Full Version Fix

you can use the full version of the hewlett-packard driver software to add duplex and multi-page printing and to convert a single-page to a multipage document. you can use the driver setup wizard to customize paper sizes, paper orientation, duplex, and tagged image file format (tiff) compression. if you have a special requirement, you can simply select the menu option custom setup to use custom settings. you can also print multiple copies of one page to speed things up when you have a lot of pages to print. the hp software lets you print to a network printer or to a usb port, but you can also directly output to a port or e-mail. using the hp laserjet driver software, you can convert a single-page document to multiple pages, but you can't reduce it to one page. you can remove the common margins from a page, but you can't reduce the document size. there's also no control over the printing style, paper orientation, duplex, and tiff compression. the hp software includes a few different output options, such as usb and email. it also includes features for adding multiple pages, reducing the print quality, and converting a file to tiff format. you can use the save as dialog box to save a file with a specific name, and you can print directly to a remote printer or local usb port. mac os x version 10.5 supports the use of a windows driver in addition to the mac os native support. you can print from any laserjet printer on a windows xp or vista pc using the included hp driver for that os. mac users can use the mac os built-in default settings or print with settings customized through the driver, which you can find in the control panel. for linux, most laserjet printers are supported in versions 8.11 and later of the open-source cups (common unix printing system) software.
